

Vendor Lead API Guide

Credit Removers

Base URL

`https://creditremovers.com/api/vendor`

Authentication

Authorization: Bearer crv_live_your_private_key_here

Alternative header:

X-API-Key: crv_live_your_private_key_here

Get New Leads

Use this endpoint to retrieve leads assigned to your vendor account. When the endpoint returns a lead, Credit Removers marks that lead as delivered so it is not returned again on the next request.

```
GET /leads
GET /leads?limit=25
```

Response Fields

Field	Description
id	Credit Removers lead ID. Useful for deduplication.
date	ISO timestamp for when the lead submitted the homepage form.
name	Lead full name.
email	Lead email address.
phone	Lead phone number.
notes	Credit Score, Negative Items, and Has Credit Report answers.

Example Request

```
curl -X GET "https://creditremovers.com/api/vendor/leads?limit=25" \
-H "Authorization: Bearer crv_live_your_private_key_here"
```

Example Response

```
{
  "vendor": { "id": 3, "name": "Example Debt Partner" },
  "count": 1,
  "data": [
```

```
{
  "id": 1042,
  "date": "2026-05-29T17:20:11.000Z",
  "name": "Jane Customer",
  "email": "jane@example.com",
  "phone": "818-555-0123",
  "notes": "Credit Score: 601 - 700\nNegative Items: 6 - 9\nHas Credit Report: Yes"
}
```

Operational Notes

- Poll at a reasonable interval, for example every 5 to 15 minutes. Avoid polling multiple times per second.
- A 200 response with count 0 means there are no new assigned leads for that vendor.
- A 401 response means the API key is missing, wrong, inactive, or rotated.
